DIRECT BEET CROPS TOWARD SUGAR PRODUCTION -- Budapest, Friss Ujsag, 23 Aug 50

The official Hungarian gazette Magyar Kozlony, recently published a Decree on the consumption of sugar beets which specifies that domestic and imported sugar beets may only be used for the production of sugar, except when the Minister of Light Industry gets prior permission from the Minister of Agriculture to use the beets for other purposes. The grower is required to turn over his entire crop to the sugar-refining enterprise, regardless of whether a contract so providing has been signed or not. A crop which has been contracted for is turned over according to the terms of the contract. The Minister of Agriculture and the Minister of Light Industry determine the terms under which excess sugar beets are to be turned over to the factories. It is unlawful to remove beets from the ground before the expiration of a designated period of time after the crop is thinned. To insure the purity of sugar beet seed, the Minister of Agriculture may order the removal of certain plantings even after thinning.

UP CANNING INDUSTRY OUTPUT QUOTAS -- Budapest, Vilagossag, 19 Aug 50

The scheduled production of dried fruits in 1950 will be 23 times that of last year. Canned vegetable production will be increased 28 percent, canned tomatoes 80 percent, canned fruit juice 58 percent, and deep frozen foods will be increased 57 percent.

This year's production of canned meat will be more than 4 times that of 1949, and canned fish production will increase 19 percent.

CLOTHING INDUSTRY TOPS PLAN -- Budapest, Vilagossag, 13 Aug 50

In the second half of 1950, the clothing industry will exceed its plan by 180,000 articles of women's linen clothing; 100,000 articles of bedding; 129,000 boy's and girl's coats; 212,000 boy's suits; 15,000 dresses; 17,000 men's overcoats; 330,000 shirts; 57,000 suits; 50,500 trousers; 57,000 short jackets; and 25,000 women's hats.

SHOE FACTORIES ADOPT ASSEMBLY LINE METHODS -- Budapest, Friss Ujsag, 19 Aug 50

The production of the leather and shoe industries will be significantly increased this year. Many factories will install conveyor belt production lines this year, including the Duna-Tisza, the Bonyhad, and Szombathely factories. A production line is already in operation at the Bortext factory. The new methods cut production time from the previous 4-5 days to 10-12 hours. Additional machines and installations will be added to improve production and to cut production costs.
